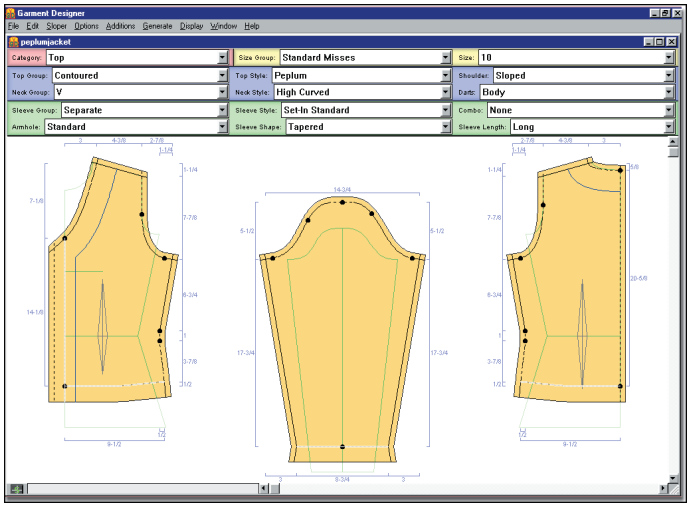
Garment Designer Pattern Software (Windows or Mac)



It's creative! It's easy! It's fun!

Garment Designer is an easy-to-use pattern design program that allows you to create unique garments. With its built-in standard sizes, or custom-fit option, you can create garments for your family and friends. Works for sewing and/or knitting!

Whether you are copying a ready-to-wear style or creating your own design, you will start a pattern by choosing the style options you want to combine. Further customize the garment by moving pattern points and lines on the screen. When you are satisfied with your design, add any combination of hems, extensions, facings, bands and seam allowances. Then print a paper pattern for sewing (pages will tile), or shaping instructions for knitting. If you are a novice patternmaker, you will be able to create a full wardrobe of unique and personal patterns.

Fit Control

- Standard sizes for women (Misses, Women, Petite, Junior), Men, Children, Toddlers, Infants, and Dolls.
- Simple-Fit or Refined-Fit custom slopers
