Stitch PAINTER 3

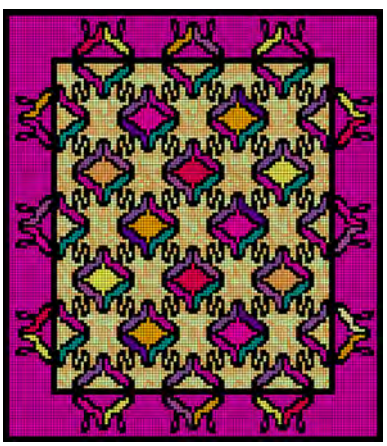

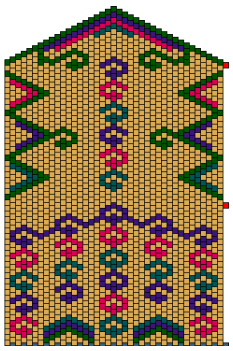

Cochenille Design Studio is pleased to offer textile and fiber artists Stitch Painter 3.5, a powerful software program which allows you to create grid designs simply and quickly on your computer screen. Now you may have a full working palette of 250 colors, symbols and/or textures on the screen at one time, pulling from a palette of millions.

Grid design has never been easier. Paint stitches on a grid. Design in repeat, or build an image stitch by stitch. If you like, import artwork from the clipboard and create instantly gridded designs. Once you have created an interesting motif, capture it and experiment. Rotate it, flip it, resize it - you are limited only by your imagination.

Stitch Painter will step you into a world of creativity. It is simple to use, yet very powerful. The artist has full control over the grid dimensions, palette (colors, symbols or textures), repeat size and brush manipulations.

In addition to knitting and stitchery, Stitch Painter may be used to design for crochet (linear style), weaving, tapestry, ikat, canvas work, counted cross-stitch, beading and other forms of stitchery design.

Features

- A grid which may be adjusted, resized, displayed or invisible.
- Stitch coordinates which display the stitch & row location.
- A History panel which allows multiple step undo's
- Brush tool which allows you to design as well as perform tasks such as cut, copy, paste, flip, rotate and resize.
- A Brush History panel that lets you work with multiple brushes at once.
- The ability to save brushes to form a library of motifs.
- Design in Repeat option over the entire screen or on selected areas.
- Fill and Zoom functions.
- Paste Special feature which allows the import of 2-color bit-mapped images from elsewhere.
- Export files in multiple file formats including .jpg and .png
- Ability to control grid color and demarcations, plus the ability to print with grid rulers.
- Palette controls such as copy, swap, spread.
- Palette Stencil which allows greater design control.
- Editable palettes which allow you to mix any color and create custom symbols or textures
- Additional advanced Palette functions.
- Sample files and palettes for knitting, cross-stitch, crochet.
- Multiple other features
